THINK IN SYNC.

Getting aligned with customers can be a challenge, especially when you're just starting to bounce ideas back and forth. The KITS Collaborator™ provides a way to picture what everyone's thinking. Browse catalogs, explore thought starters, specify mockups and generate fast, accurate visuals while you talk.

Other tools in the industry limit what you can build. Collaborator removes those barriers, giving you the freedom to explore ideas and sell without restrictions. The speed and versatility of Collaborator doesn't just allow for rapid ideation. It fuels creative flow and lays a smooth foundation for the steps to follow, allowing for a quicker route to iteration, implementation, and immersion. Collaborator takes the toughness out of 'Where do we start?' and allows you to move freely from rough ideas and 'what-if's' to 'Wow!'.

This mobile app goes anywhere you do and has everything you need for a successful presentation and stunning visuals to make the sale. Just a few taps can draw up 3D layouts, realistic renderings, and floorplans that show how spaces will look and function. It's a game-changing way to explore options, gather feedback, and close every sale in fewer meetings.

DIGITAL CATALOGS

Browse our constantly growing collection of 120+ manufacturer catalogs—even offline.

THOUGHT STARTERS

Use pre-built layouts to start conversations and explore client options.

VISUAL CONFIRMATIONS

Create fast, realistic renderings in medium or high fidelity to model solutions.

ENGINEERED FOR THE BUILT ENVIRONMENT

Purpose-built for the complexity and demands of workplace products and furniture.

SEE HOW COLLABORATOR SEALS THE DEAL.

QUICKSHEET QUOTING

Build accurate, real-time quotes before the meeting's done—no spreadsheets required.

BUILT-IN ANNOTATION

Add notes, callouts, and dimensions to clarify next steps and feedback.

LIVE SPECIFICATION

Compare options, specify, and finalize details on the spot—saving days and dollars.

EFFICIENT HANDOFF

Push ideas seamlessly from CET to Collaborator for client presentations.

EASY SHARING

Give stakeholders a clear, visual summary to get their signoff faster.

MOBILE SALES MADE EASY

With Collaborator, you can have a closer in the room for every meeting. The mobile app travels anywhere your salespeople do, giving them a convenient way to browse options, make visual comparisons, edit on the fly, and come to a consensus – all from the convenience of their tablet. Browse 120+ digital catalogs (instead of carrying printed copies and sample books), update illustrations on the spot (without sending the plan back to design), and build customer confidence in every decision so you can change meeting outcomes from "Let me think about it" to "Let's do this."

GET STARTED WITH COLLABORATOR.

1

REACH OUT TO LEARN MORE

We'd love to answer your questions and share a demo to show you everything Collaborator can do.

2

CHOOSE YOUR PACKAGE

Our standard Windows and iOS versions are just $445/year, and the XRPro Edition for AR and VR is $595/year.

3

TRAIN TODAY, USE IT TOMORROW.

You don't have to be an artist. Our free training will turn you into a Collaborator pro in no time, and our customer service team is always standing by should you need a little more support.

4

TAKE IT EVERYWHERE YOU GO.

Leave the storyboards, swatches, and large screens at the office. With Collaborator on your tablet, you'll have polished, professional tools for every sales meeting.

MEET THE REST OF THE KISP FAMILY.

A powerful set of digital tools and services designed to support your sales at every stage from concept to close.

Entity

The digital tools of today and tomorrow all rely on one thing: data. Entity turns your catalog into one clean, accurate, and comprehensive set of data that can power all of our apps – and those from the other brands you use, too. And it's free and accessible to you all the time.

KITS Configurator

How do you help customers navigate an almost endless sea of colors, fabrics, finishes, and accessories? With Configurator. It's designed to help customers see how products look with every option, using detailed renderings to funnel down to smarter decisions.

SnapTracker™

Manage furniture assets throughout their lifecycle, from warehouse to workspace and reuse or resale. Track the location, stage, and condition of every item, connecting seamlessly with leading procurement platforms to reduce waste, optimize value, and support sustainability.

Services That Help You Sell

There's more to KiSP than our software. We also offer expert services in visualization, CAD, and data creation. From CAD to virtual reality, product illustrations, and whatever visual support you need to sell, our team will work to elevate every project.

THRIVE IN THREE DIMENSIONS.
